11. Frequently Asked Questions

1. Getting Started

Server+ Study Desk is a single self-contained website built to help you prepare for the CompTIA Server+ (SK0-005) certification exam. Everything — the question bank, flashcards, acronym glossary, and your saved progress — lives inside your browser. There is nothing to install and no account to create.

To start studying:

- Open the file in any modern web browser (Chrome, Edge, Firefox, or Safari).
- Use the sidebar (or top/bottom navigation, depending on your chosen layout) to move between sections.
- Your progress is saved automatically after every question you answer.

The site works fully offline once loaded -- no internet connection is required to use it.

2. Dashboard

The Dashboard is your home screen and gives an at-a-glance view of your progress across the entire exam.

Top stat cards. Questions attempted, overall accuracy, PBQs mastered, and your current day streak.

Question performance donut. A visual breakdown of correct, incorrect, and not-yet-attempted questions.

Accuracy by domain. Bar comparison of your accuracy in each of the four exam domains against that domain's real weight on the exam.

Progress by objective. Every one of the 25 sub-objectives with its own progress bar -- click any objective to jump straight into a focused quiz on just that topic.

Last 7 days. A daily activity chart showing how many questions you've answered each day this week.

Today's goal. Tracks your progress toward the daily question goal you set in Settings.

Study material overview. Totals for the question bank, PBQs, flashcards, and acronyms, plus a breakdown of questions per domain.

3. Practice Quiz

The Practice Quiz section draws from the full question bank of 1,766 multiple-choice questions, covering every objective in all four exam domains.

How it works:

- Choose a batch size (5, 10, 25, 50, 100, 200, or all available questions).
- Answer each question -- the correct answer and a full explanation appear immediately after you respond.
- At the end of a batch, you'll see your score and a complete review of every question, your answer, and the explanation.

- To focus on a single objective, click that objective's link in the sidebar (or on the Dashboard's per-objective list) instead of the main Practice Quiz link.

4. Flashcards

298 flashcards cover every key concept and named technology across the exam objectives. Each card shows the term first; click it to flip and reveal both the definition and a short note on why it matters for the exam.

- **Concepts** -- key terms and technologies grouped by objective.
- **Acronyms** -- all 225 acronyms from the official SK0-005 acronym list, each with a plain-language explanation.
- **All** -- both decks combined and shuffled together.

Use Shuffle to randomize order, and Prev/Next to move through the deck at your own pace.

5. Performance-Based Questions (PBQs)

200 hands-on exercises mirror the interactive question styles used on the real exam. Each PBQ is one of two types:

- **Matching exercises** -- use the dropdowns to match each term or acronym on the left to its correct definition on the right.
- **Sequencing exercises** -- use the dropdowns to place multi-step server procedures (troubleshooting steps, RAID rebuilds, backup restores, and more) in the correct order.

Press "Check answers" to grade your attempt -- correct rows turn green and incorrect rows turn red so you can adjust and try again. "Shuffle again" generates a new random arrangement of the same exercise.

6. Troubleshooting Methodology Drill

Objective 4.1 (Troubleshooting theory and methodology) gets its own dedicated page, since the seven-step methodology shows up throughout nearly every Domain 4.0 question.

The page includes a full written reference of all seven steps, followed by an interactive drill where the steps are shuffled and you must reconstruct the correct order using the dropdown selectors.

7. Acronym Glossary

A searchable, complete glossary of all 225 acronyms that appear on the SK0-005 exam, matching the official CompTIA acronym list. Type in the search box to instantly filter by acronym, expansion, or keywords in the explanation.

8. Study Tips

Strategy guidance organized around how the SK0-005 exam actually tests each domain -- not just raw facts to memorize. Topics include scenario-based reasoning, the troubleshooting methodology, RAID level trade-offs, separating the security-domain concepts, scripting fundamentals, and an effective approach to drilling acronyms.

9. Settings & UI Customization

The Settings page gives you full control over both the look of the site and your study preferences.

Theme

42 built-in color themes are available, grouped by color family, each shown as a live preview swatch with background, surface, and accent colors. Click any swatch to apply it instantly.

Layout

10 distinct layout models restructure the navigation and content areas -- each shown with a small live preview diagram before you choose it:

Sidebar Left (default)	Sidebar Right
Top Nav Bar	Bottom Nav Bar
Compact Icon Rail	Boxed Canvas
Dashed Drawer	Floating Panels
Wide Panel	Top Tabs

Custom Colors

Beyond the 42 preset themes, every individual color used across the site can be overridden directly: background, surface/card, sunken panel, text, muted text, accent, accent text, border, success, danger, and warning. Overrides layer on top of whichever theme is selected and persist until you reset them, either individually or all at once.

Density, Corners & Motion

Choose between Comfortable, Compact, or Spacious spacing; Sharp, Soft, Rounded, or Extra-round corners; and toggle Reduced Motion to turn off transitions and animations site-wide.

Text Size

A single slider rescales all text on the site from 8px up to 28px, with a live preview so you can find a comfortable reading size before applying it.

Study Tools

Set your default quiz batch size and your daily question goal, which drives the progress bar shown on the Dashboard.

Documentation

This user manual, and a downloadable copy of the full SK0-005 exam objectives, are both available as direct downloads from the Settings page.

Reset Progress

A single button clears all saved quiz history, PBQ completions, and streak data on this device. This action cannot be undone, so a confirmation prompt appears before anything is deleted.

10. Data, Privacy & Resetting Progress

All progress and settings are stored using your browser's local storage, tied to this specific browser on this specific device.

- Nothing is ever sent to a server -- there is no server. The site works fully offline.
- Clearing your browser's site data, using a different browser, or switching devices will not carry your progress over.
- To back up your progress, keep a copy of your browser profile, or simply continue studying from the same browser on the same device.
- Use the "Reset all progress" button in Settings if you want to start completely fresh.

11. Frequently Asked Questions

Q: Do I need an internet connection?

A: No. Once the page is open, everything runs locally in your browser, including all questions, flashcards, and acronyms.

Q: Will my progress sync between devices?

A: No. Progress is stored only in the browser you're using. Opening the site in a different browser or on a different device starts fresh.

Q: Can I use this on my phone or tablet?

A: Yes. The layout is responsive, and several of the 10 layout options (like Bottom Nav Bar or Icon Rail) are especially convenient on smaller screens.

Q: How closely does this match the real exam?

A: The question bank, PBQ styles, and acronym list are built directly from the official CompTIA Server+ (SK0-005) exam objectives. This is a study aid, not an official CompTIA product.

Q: What happens if I clear my browser cache?

A: Clearing site data/cache for this page will remove your saved progress and settings, since both are stored in local storage.

Q: Can I reset just my theme/layout without losing quiz progress?

A: Yes. Resetting custom colors or changing the theme/layout in Settings has no effect on your quiz progress, which is stored separately.

This is an independent study aid and is not affiliated with or endorsed by CompTIA. For the official, authoritative exam objectives document, see [comptia.org/certifications/server](https://www.comptia.org/certifications/server).
